159 Research Project in Information Systems

Please fill in this document, and resubmit it via the VLE at the same time as you submit your final project. It is a basic Microsoft Word table. Boxes will expand as you type and where you are asked a "yes"/"no" question please type "X" next to the appropriate answer. Please do not exceed the **maximum** word count indicated in the various sections

SECTION 1: CANDIDATE DETAILS	FILL IN THIS COLUMN
Name	Anil Emanuel
Student Number	120472266
Project Title	Determining the effects of information technology on Impulsive Buying Behaviours in the Online Food Industry of Pakistan with focus on social media marketing
Word Count (excluding Appendices)	8879
Date	

SECTION 2: PROJECT SUMMARY	FILL IN THIS COLUMN
Brief description of the topic (50 words)	The realm of social media marketing is expanding significantly over the years and it has substantially affected the online food consumption patterns. It is anticipated that viral marketing on social media marketing increases online impulsive buying behaviours. For this purpose, the research study was conducted in the Pakistani online food industry.
Central Research Question (20 words)	What are the impacts of social media marketing on online impulsive buying behaviours in the Online Food Industry of Pakistan?
Original Research Objectives (100 words)	The original objectives of the research study were: 1) To measure the impacts of social media marketing on online consumer behaviour. 2) To explore the effects of viral marketing among social media marketing and consumer behaviours.
Revised research objectives (and why revised) (100 words)	The objectives of the study were revised and online impulsive buying behaviours was incorporated instead of consumer behaviours since impulsive of buying online food remained the central question. Revised objectives: 1) To measure the impacts of social media marketing on online impulsive buying behaviour. 2) To explore the effects of viral marketing among social media marketing and online impulsive buying behaviours. 3) To determine the effects of social media marketing on online impulsive buying behaviours making in the online food industry of Pakistan.

Four Keywords to describe the project	Social Media Marketing, Online Impulsive buying behaviours, Online Food Industry, Digital Marketing

SECTION 3: ANALYTICAL FRAMEWORK CHECKLIST	FILL IN THIS COLUMN			
Does your report contain a clearly expressed research question?	YES S	✓	NO	
Does your report contain a review of relevant and up-to-date literature?	YES S	✓	NO	
Does your report include a clearly expressed analytical framework (e.g. chosen theory, set of concepts etc.)	YES S	✓	NO	
Briefly describe the framework you are using (50 words)	Social media marketing is taken as independent variable while online impulsive buying behaviours is taken as dependent variable. Meanwhile viral marketing is taken as moderating variable.			

SECTION 4: PRIMARY DATA COLLECTION TECHNIQUES CHECKLIST (select as appropriate)						
Questionnaire	Questions derived from theoretical framework?	✓	Piloted?	✓	Data analysed (more than described)?	✓
Interviews	Interview themes given?		Interviews coded?		Interviews analysed?	
Observation	What type?		Participant		Non Participant	
	Method of Analysis Used		Survey Method using Questionnaire. Statistical Analysis applied			
Documents	What types?	Structured questionnaires used constructed on five point Likert scale				
	Analysis technique used?	Statistical analysis of normality, correlations, reliability and regression				
Other (give brief description)	It was a quantitative research study in which structured interviews were used. The data was taken from the respondents online and data analysis was done on SPSS using statistical tests of normality, correlations, reliability and regression					

SECTION 5: FINDINGS AND ANALYSIS CHECKLIST	FILL IN THIS COLUMN			
Does your report clearly express the findings from your project and relate them to an identified information systems theme?	YES	✓	NO	
What is the Information Systems theme your work addresses? (50 words)	The information systems theme addressed in this research study is data collection and management. The social media aspect has been inspected since it is one of the most growing domain globally. The orientation remained to identify online impulsive buying patterns in the Pakistani food industry.			

What kind of a contribution do you make in this area? Who would be interested in reading your work and making use of your findings? (100 words)	This study will be significant for the researchers, marketers and entrepreneurs. The marketers and managers would attain advantage through the outcomes of this study that in what ways social media marketing influences on the online impulsive buying behaviours. The researchers will get substantial benefit from this study as they would get to know the prevailing trends in the social media marketing and will also understand the online impulsive buying behaviours in a different manner. The study will give concrete advantages to the entrepreneurs too that how social media marketing works in the emerging markets.

SECTION 6: PRESENTATION CHECKLIST	FILL IN THIS COLUMN			
Is your report printed to the guidelines given in the Subject Guide?	YES	✓	NO	
Does your Conclusion chapter contain the essential insights of your work?	YES	✓	NO	
Are all quotations and material taken from other works properly presented and fully acknowledged?	YES	✓	NO	
Are all your references to books, articles and web sites in a full and proper format (author, title, publisher, date etc.) and presented in the bibliography	YES	✓	NO	

SECTION 7: SUBMISSION CHECKLIST	FILL IN THIS COLUMN			
Have you included the Topic Area Proposal and a Project Specification as the first two appendices of your written report?	YES	✓	NO	
Have you completed and signed the submission cover sheet	YES	✓	NO	
Have you prepared a file of your project report for uploading?	YES	✓	NO	

SECTION 8: PERSONAL REFLECTIONS FILL IN THIS BOX
In no more than 200 words (1 page), give your personal reflection on undertaking this project. What you have learned and what lessons you would want to pass on to future cohorts of students. The research study has enabled to explore my hidden talents and aptitude. The secondary and primary data collection part is quite difficult as substantial amount of readings have to be done and for questionnaire data attainment, identification of relevant target market and then requesting them to fill out the online survey form is a hectic task. Overall, the research work has provided me the direction that how social media is working globally and what sorts of impact it has laid on the online businesses. Business spheres have been expanded due to the online marketing mix and there has been significant amount of online impulsive buying behaviours in the Pakistani food industry. The research study also gave me the lesson that there is still plenty of room in the online business industry of Pakistani and indulging in entrepreneurial activities can be quite fruitful. The lessons for future cohorts students will be that following SMART objectives for the conduction of research study is imperative as the objectives must be specific, measurable, attainable, realistic and time bound. During research, frustration and tension also surfaces since there is a lot to be studied and consequently write, but these all endeavours eventually make nerves strong.
